HYPERTENSION JULY-DECEMBER 1987

SUBJECT INDEX

Key to abbreviations: BR = brief review; E = editorial; L = letter; RC = rapid communication; SR = special report. Roman numerals preceding page numbers indicate articles published in supplements.

A

Abstracts, Council for High Blood Pressure Research
Abstracts of the Council for High Blood Pressure Research 41st Annual Fall Conference and Scientific Sessions, 354

Acetylcholine
Impaired endothelium-dependent relaxations in rabbits subjected to aortic coarctation hypertension, 164

Adenosine
Development and application of a simple microassay for adenosine in rat plasma, 189

Adenosine triphosphatase
Erythrocyte ghost Na^+,K^+-ATPase and blood pressure, 259

Adolescents
Enhanced forearm blood flow during mental stress in children of hypertensive parents, 544
Insulin and blood pressure during weight loss in obese adolescents, 267

Adrenalectomy
Regulated systemic activation of rat plasma prorenin, 122 (RC)

Adrenal gland
Central dopaminergic regulation of aldosterone secretion in sheep, 157

Adrenergic nerves
Enhanced 5-hydroxytryptamine release from vascular adrenergic nerves in spontaneously hypertensive rats, 321

Adrenergic receptor blockade
Effect of β-adrenergic receptor blockade on atrial natriuretic peptide in essential hypertension, 221

Adrenergic receptors
Selective modification of renal α_2-adrenergic receptors in Milan hypertensive rat strain, 505

Age
Age, race, diagnosis, and sodium effects on the pressor response to infused norepinephrine, 564
Blood pressure response to potassium supplementation in normotensive adults and children, 437
Correlates of plasma atrial natriuretic factor in health and hypertension, 570
Effect of advancing age on cardiopulmonary baroreceptor function in hypertensive men, 274
Epidemiological studies of sodium transport and hypertension, I-42
Increased rigidity of red blood cell membrane in young spontaneously hypertensive rats, 603
Insulin and blood pressure during weight loss in obese adolescents, 267
Is there a black hypertension? 551 (E)
Synopsis of the report of the Second Task Force on Blood Pressure Control in Children, 115 (SR)
Tilt test in essential hypertension: differential responses in heart rate and vascular resistance, 29

Aldosterone
Antihypertensive and hypotensive effects of atrial natriuretic factor in men, 582
Calcium in the regulation of aldosterone secretion and vascular smooth muscle contraction, I-23
Central dopaminergic regulation of aldosterone secretion in sheep, 157
Renin suppression by saline is blunted in nonmodulating essential hypertension, 404

Aldosteronism
Renal function curve in patients with secondary forms of hypertension, 11

Angiography
How can we diagnose coronary heart disease in hypertensive patients? 467 (E)

Angiotensin
Report of the Joint Nomenclature and Standardization Committee of the International Society of Hypertension, the American Heart Association, and the World Health Organization, 461 (SR)

Angiotensin II
Calcium in the regulation of aldosterone secretion and vascular smooth muscle contraction, I-23
Effect of angiotensin II on baroreceptor reflex control of heart rate in conscious baboons, 628
Effect of sodium balance and calcium channel blocking drugs on blood pressure responses, 239
Ethanol-induced hypertension involves impairment of baroreceptors, 67
Glucocorticoids modulate vascular reactivity in the rat, 608
Structure and physiological actions of rat atrial natriuretic factor, I-113

Antihypertensive agents
Arterial and venous compliance in sustained essential hypertension, 133 (BR)
Captopril-induced creatine kinase elevations: a possible role of the sulfhydryl group, 234 (L)
Cardiovascular and renal profile of acute peripheral dopamine$_1$-receptor agonism with fenoldopam, 43
Coexistence of hypertensive and coronary arterial disease, 473 (E)
Effect of captopril and hydralazine on arterial pressure–urinary output relationships in spontaneously hypertensive rats, 590
Multiple effects of calcium entry blockers on renal function in hypertension, 140 (BR)

Aprotinin
Role of prostaglandins and kinins in the renal pressor reflex, 522

Arachidonic acid
Plasma nonesterified fatty acids in the Dahl rat: response to salt loading, 198
Renal phospholipase C and diglyceride lipase activity in spontaneously hypertensive rats, 100

Arginine vasopressin (*see also* Vasopressin)
Hypotensive and bradycardic effects of centrally administered vasopressin stroke-prone spontaneously hypertensive rats, 346 (RC)
Inhibition of muscle sympathetic nerve activity in humans by arginine vasopressin, 409
Aromatase inhibitor
Antihypertensive effects of an aromatase inhibitor in the spontaneously hypertensive rat, 484
Arterioles
Arteriolar reactivity to pressure stimuli in hamsters with renal hypertension, 82
Aspirin
Aspirin enhances the antihypertensive effect of captopril in spontaneously hypertensive rats, 294
Atrial natriuretic factor
Antihypertensive and hypotensive effects of atrial natriuretic factor in men, 582
Correlates of plasma atrial natriuretic factor in health and hypertension, 570
Effect of β-adrenergic receptor blockade on atrial natriuretic peptide in essential hypertension, 221
Effect of atrial natriuretic factor on Na^+-K^+-Cl^- cotransport of vascular smooth muscle cells, I-128
Effects of antiserum against α–rat atrial natriuretic peptide in anesthetized rats, 308
Effects of volume change on circulating immunoreactive atrial natriuretic factor in rats, 171
Endogenous digitalislike compounds: a tentative update of chemical and biological studies, I-67
The heart as an endocrine gland, I-118
Papillary collecting tubule responsiveness to atrial natriuretic factor in Dahl rats, 107
Pathophysiological role of cation transport and natriuretic factors in hypertension, I-101
Pressure dependence of atrial natriuretic peptide during norepinephrine infusion in humans, 249
Report of the Joint Nomenclature and Standardization Committee of the International Society of Hypertension, the American Heart Association, and the World Health Organization, 461 (SR)
Role of nisoldipine on blood pressure, cardiac hypertrophy, and atrial natriuretic peptides in spontaneously hypertensive rats, 303
Structure and physiological actions of rat atrial natriuretic factor, I-113
An update on the physiology of atrial natriuretic factor, I-122
Atrial peptide nomenclature
Report of the Joint Nomenclature and Standardization Committee of the International Society of Hypertension, the American Heart Association, and the World Health Organization, 461 (SR)

B

Baboon studies
Echocardiographic left ventricular mass and function in the hypertensive baboon, 339
Effect of angiotensin II on baroreceptor reflex control of heart rate in conscious baboons, 628
Baroreceptor reflexes
Assessment of baroreceptor reflex sensitivity by means of spectral analysis, 538
Cardiovascular response to acute stress in spontaneously hypertensive rats, 550 (L)
Effect of angiotensin II on baroreceptor reflex control of heart rate in conscious baboons, 628
Inhibition of muscle sympathetic nerve activity in humans by arginine vasopressin, 409
Sensitization of aortic baroreceptors by high salt diet in Dahl salt-resistant rats, 55
Tilt test in essential hypertension: differential responses in heart rate and vascular resistance, 29
Baroreceptors
Effect of advancing age on cardiopulmonary baroreceptor function in hypertensive men, 274
Ethanol-induced hypertension involves impairment of baroreceptors, 67
Inverse relationship between heart rate and blood pressure variabilities in rats, 533
Sensitization of aortic baroreceptors by high salt diet in Dahl salt-resistant rats, 55
Bioassay methods
Development and application of a simple microassay for adenosine in rat plasma, 189
Humoral sodium transport inhibitor in acute volume expansion and low renin hypertension, I-78
Black population
Age, race, diagnosis, and sodium effects on the pressor response to infused norepinephrine, 564
Effects of race and marginally elevated blood pressure on responses to stress, 555
Epidemiological studies of sodium transport and hypertension, I-42
Erythrocyte ghost Na^+,K^+-ATPase and blood pressure, 259
Humoral sodium transport inhibitor in acute volume expansion and low renin hypertension, I-78
Is there a black hypertension? 551 (E)
Kinetic analysis of erythrocyte Na^+-K^+ pump and cotransport in essential hypertension, 204
Blood-brain barrier
Assessment of the permeability of the blood-retinal barrier in hypertensive rats, 390
Blood flow
Effects of chronic exercise on the coronary circulation in conscious rats with renovascular hypertension, 74
Enhanced forearm blood flow during mental stress in children of hypertensive parents, 544
Blood pressure
Arterial and venous compliance in sustained essential hypertension, 133 (BR)
Arteriolar reactivity to pressure stimuli in hamsters with renal hypertension, 82
Aspirin enhances the antihypertensive effect of captopril in spontaneously hypertensive rats, 294
Association of haptoglobin with sodium sensitivity and resistance of blood pressure, 443
Blood pressure response to potassium supplementation in normotensive adults and children, 437
Cardiovascular and renal profile of acute peripheral dopamine$_1$-receptor agonism with fenoldopam, 43
Coexistence of hypertensive and coronary arterial disease, 473 (E)
Decreased intraocular pressure in dogs with one-kidney, one wrapped hypertension, 152
Dietary calcium intake in hypertension, 350 (L)
Does so-called streptozocin hypertension exist in rats? 517
Effect of advancing age on cardiopulmonary baroreceptor function in hypertensive men, 274
Effect of captopril and hydralazine on arterial pressure–urinary output relationships in spontaneously hypertensive rats, 590
Effect of dietary fats and carbohydrate on blood pressure of mildly hypertensive patients, 452
Effect of sodium balance and calcium channel blocking drugs on blood pressure responses, 239
Effects of antiserum against α–rat atrial natriuretic peptide in anesthetized rats, 308
Effects of hydrochlorothiazide and diltiazem on reflex vasoconstriction in hypertension, 35
Effects of race and marginally elevated blood pressure on responses to stress, 555
Enhanced forearm blood flow during mental stress in children of hypertensive parents, 544
Epidemiological studies of sodium transport and hypertension, I-42
Erythrocyte ghost Na^+,K^+-ATPase and blood pressure, 259
Ethanol-induced hypertension involves impairment of baroreceptors, 67
Fructose-induced insulin resistance and hypertension in rats, 512
Glucocorticoids modulate vascular reactivity in the rat, 608
How can we diagnose coronary heart disease in hypertensive patients? 467 (E)
Hypotensive and bradycardic effects of centrally administered vasopressin stroke-prone spontaneously hypertensive rats, 346 (RC)
Inhibition of hypertension and salt intake by oral taurine treatment in hypertensive rats, 383

Insulin and blood pressure during weight loss in obese adolescents, 267
Inverse relationship between heart rate and blood pressure variabilities in rats, 533
Kinetic analysis of erythrocyte Na^+-K^+ pump and cotransport in essential hypertension, 204
Oral calcium treatment lowers blood pressure in renovascular hypertensive rats by suppressing the renin-angiotensin system, 375
Pregnancy hypertension, blood pressure during labor, and blood lead levels, 447
Pressor response to small elevations of cerebroventricular pressure in conscious rats, 635
Pressure dependence of atrial natriuretic peptide during norepinephrine infusion in humans, 249
Progress in the battle against hypertension: changes in blood pressure levels in the United States from 1960 to 1980, 226 (SR)
Renal function curve — a key to understanding the pathogenesis of hypertension, 1 (E)
Renal function curve in patients with secondary forms of hypertension, 11
Repetitive natriuresis and blood pressure: long-term calcium entry blockade with isradipine, 577
